EXPERIENCE

Shipdelight Logistics Technology   Dec 2021- Present
senior software developer   Onsite, Mumbai

- Developed and maintained **multiple brand tracking portals**, enabling customers to track their orders, initiate returns, and process exchanges for renowned brands such as Neeman's (neemans.shipdelight.in) and Perfora (perfora.shipdelight.in).
- Designed and implemented a robust **wallet system** integrated with the e-commerce platform, facilitating seamless online transactions and order management.
- **Implemented Redis**, an in-memory data structure store, to cache frequently accessed data, reducing the analytics dashboard load time from **5 minutes to near real-time**.
- Designed and developed a robust caching strategy using **Redis**, ensuring data consistency and optimizing resource utilization.
- Integrated real-time order pulling from **Shopify, WooCommerce, and Magento** platforms, enabling seamless synchronization of order data across multiple e-commerce stores; **implemented webhooks** for these platforms, facilitating **automatic status updates** and ensuring timely order tracking and inventory management; developed robust data processing pipelines to handle high volumes of order data and status updates, ensuring scalability and reliability of the integrations; collaborated with cross-functional teams to ensure smooth integration with existing systems and processes, enabling end-to-end order visibility and efficient operations.
- Implemented integrations with **courier booking and tracking APIs**, including **Smarter, BlueDart, and Ecom**, enabling automated courier assignment, shipment tracking, and real-time status updates across multiple logistics providers, ensuring seamless order fulfillment and delivery coordination.
- Integrated **communication APIs** from providers like **Gupshup** and **Fyno**, enabling seamless customer interactions through WhatsApp, email, and SMS channels; **implemented automated notifications** and updates throughout the order lifecycle, enhancing customer experience and ensuring transparent communication.
- Demonstrated proficiency in **integrating diverse third-party APIs**, seamlessly incorporating various functionalities and services into applications, including **authentication providers, payment gateways, communication channels** (e.g., WhatsApp, email, SMS), logistics and courier tracking, and e-commerce platforms (Shopify, WooCommerce, Magento).

- **Tech stack**:,python,FastAPI,Redis.React.js,Vuejs,Nuxtjs,REST APIs,Node.js
- websites: neemans.shipdelight.in, perfora.shipdelight.in,

Edulab   SEP 2021- DEC 2021 (4 Months)
MEAN Stack Intern   Onsite, Mumbai, India

- Developed and maintained web applications for educational and government organizations using the MEAN (MongoDB, Express.js, Angular, Node.js) stack, including KC College Official Site, SDBI, Attestation, and DTE.
- Proficient in Angular for building responsive and dynamic user interfaces, Node.js and Express.js for developing RESTful APIs, and MongoDB for data persistence and querying.
- Integrated third-party APIs, implemented security measures, conducted thorough testing, and ensured adherence to best practices and coding standards.
- Continuously explored new technologies, collaborated with teams, participated in code reviews, and provided technical guidance to junior developers.
- **Tech stack**: Angular, REST APIs, Express.js, MongoDB, Node.js

PROJECTS

Portfolio | Website | Code | **React.js**,*Tailwind*

- I developed a professional portfolio website using **React.js**, HTML, and CSS, showcasing my skills, projects, and experience in an interactive and visually appealing manner, effectively highlighting my expertise to potential employers and clients.

TECHNICAL SKILLS

Programming languages:	**Python,**Javascript
Frameworks:	Fastapi,Django,flask,React.js,NuxttJS, Node.js
Frontend tech:	HTML,CSS,Tailwind,
Databases:	MongoDB, MySQL, Redis, PostgreSQL
Other:	Git, Github
Tools:	Netlify,
